EXPERTISE

- HTML, CSS JavaScript, TypeScript, Ruby
- React.js, Next.js, Gatsby.js, Node.js, Ruby on Rails
- SASS, Tailwind, Bootstrap, Material-UI

EDUCATION

Certified Full-Stack developer

Microverse Nov 2021 - June 2022

Diploma Blockchain Specialist

PIAIC Mar 2019 - Apr 2020

Bachelors in Business Administration

COMSATS Institute of Technology Jan 2016 - Jan 2020

WORK EXPERIENCE

Core Contributor

MOZILLA

March 2023 - Present

- Collaborated with a 5-member team to release a new performance comparison tool, increasing the developer efficiency at Mozilla by 50%.
- Conducted comprehensive code reviews for the development team, implementing React best practices and identifying areas for optimization, resulting in a 20% reduction in code vulnerabilities and enhanced application performance.
- Implemented dynamic skip links, Aria Live regions, and tab roving to enhance accessibility of web application; reduced accessibility-related issues by 40% and improved user experience for all users.
- Designed Jest Tests to validate the functionality and reliability of new React components, contributing to robust quality assurance processes.
- Identified and rectified 30+ UI bugs, resulting in a 15% increase in user satisfaction and a 20% boost in overall application usability.
- Implemented over 10 complex React components in the MVP application.

React Developer

Clarity for Charities (contract)

Nov 2022 - Jan 2023

- Implemented beneficiary-related components and associated Redux slices, bolstering the application's data management capabilities and ensuring seamless user interactions.
- Developed rigorous Jest unit tests for new components, achieving a test coverage of over 90% by effectively implementing mock data and comprehensive testing strategies.
- Showcased outstanding communication skills by fostering effective collaboration within a globally dispersed, cross-functional team comprising both technical and non-technical members.
- Enhanced the dashboard's responsiveness across various screen sizes, ensuring seamless usability on mobile devices and tablet widths.
- Conducted use case analysis to identify critical user needs and streamline application functionalities, resulting in more efficient and user-centric features.

Frontend Developer

MyPhoner (contract)

Aug 2022 - Oct 2022

- Collaborated closely with the founder to plan and define actionable steps for achieving strategic goals.
- Transformed the website by migrating it from its Gatsby template and Netlify CMS to a more robust and versatile Sanity.io CMS-powered platform.
- Identified and implemented React.js components from a Bootstrap theme, seamlessly integrating them into the project.

Frontend Intern

Juubix

June 2022 - Aug 2022

- Transformed Figma designs for forms into functional React components, ensuring a pixel-perfect and responsive implementation.
- Collaborated closely with senior frontend engineers on a fintech application, contributing to the project's success
- Enhanced documentation and actively participated in brainstorming sessions to generate innovative ideas.
